EXPERIENCE

FourCore — Breach & Attack Simulation Platform, New Delhi

Feb 2024 – Jul 2026

UI/UX Design Intern → UI/UX Designer → Senior UI/UX Designer

- Led end-to-end product design for FourCore ATTACK, an enterprise breach-and-attack-simulation platform, building its design system from scratch and shipping 40+ screens across 5+ major features for enterprise, technical users. Progressed from UI/UX Design Intern to Senior UI/UX Designer in under two years and led a junior designer.
- FourCore's gross revenue doubled year-over-year after the design system was established and the new features shipped, reflecting the direct business impact of the redesigned product experience.
- Conducted competitive research and participated in client and CISO interview sessions to understand enterprise security workflows; collaborated cross-functionally with engineering and product teams in detailed requirement discussions to translate findings into shipped features.
- Owned the end-to-end UX for how attack simulation findings are presented, shaping intuitive workflows and interfaces that let security teams read, prioritize, and act on results quickly.
- Built interactive Figma prototypes that accounted for FourCore ATTACK's complex product states, paired with detailed design handoffs that reduced back-and-forth with engineering during implementation.
- Applied hands-on HTML/CSS/JS knowledge alongside AI-assisted prompt engineering to accelerate prototyping and bridge design with frontend implementation.

CoinSwitch Kuber — Crypto Investment Platform

Aug 2023 – Feb 2024

UI Developer Intern

- Built UI for CoinSwitch Kuber's KYC workflow, translating designs into functioning product screens for a live, regulated user flow.
- Worked closely with designers, engineers, and QA across the design-to-engineering pipeline, coordinating on interaction details and technical constraints during implementation.

PROJECTS

Formi

Independent Product Design · Ongoing

Physiotherapy platform · evolved from Proctify, a college project

Originally “Proctify” — a physiotherapy app for patients only, built with a 4-person team in college (Top 15, Smart India Hackathon; Top 50 Global, Google Solution Challenge). Independently reworked it into Formi, a full two-sided product neither Proctify nor its original team had scoped.

- Introduced a therapist-facing web dashboard the original concept never accounted for, alongside the existing patient app.
- Rebuilt the product from the ground up, including workflow, information architecture, and a programme-delivery model connecting therapist and patient, not just the interface.
- Authored the complete PRD and design system, a 23-screen breakdown spanning both the therapist and patient experiences, using ChatGPT and Claude to help produce PRDs, user stories, UX copy, and feature specifications.
- Leveraged Figma AI to accelerate wireframing and explore multiple UI concepts during early design phases.

Conqr.ai

Solo Freelance · 2 months

Legal AI assistant platform

Designed the single-scroll marketing landing page from scratch and redesigned the existing product (10–12 screens) solo, shaping a brief for an approachable, trustworthy legal AI experience into a calm, credible interface.

Autumn

Independent Project

E-book reader, mobile app

A subscription e-book reader designed to feel as immersive as reading a physical book, with bookmarking, notes, and a signature feature: personalized, colour-coded tabs that slide out into a sticky-note-style panel without leaving the page.

SKILLS

Design: Product Design, UI/UX Design, Design Systems, User Research, Wireframing, Prototyping, Interaction Design

Technical: HTML, CSS, JavaScript, Frontend Prototyping, AI-Assisted Development

Tools: Figma, Figma Make, Sketch, Canva, Git, GitHub, GitLab

AI & Productivity: Design Documentation, AI-Assisted UX Research, Prompt Engineering, Figma AI, ChatGPT, Claude, PRD Authoring

EDUCATION

B.Tech, Computer Science

Dec 2020 – Aug 2024

Maharaja Agrasen Institute of Technology · 8.91 / 10 CGPA

CERTIFICATIONS

UX Design · Accenture

Product Design & Development · NPTEL, 85%

Functional & Conceptual Design · NPTEL, 84%

AWARDS

Top 50, Global · Google Solution Challenge 2022

Top 15 Teams · Smart India Hackathon 2022

MENTORSHIP

UI Development Mentor · Girl Code It: ran a Git & GitHub fundamentals session for 300+ students, mentored 5+ mentees through a UI development bootcamp.
